

MJ STAND ALONE VERSION

To be mounted on the table or on the pallet of the FMS/machine. Economical and relatively compact and light.

MJP PALLET VERSION

MJ mechanism inbuilt in the machine pallet for the most compact and light solution. To be developed with the cooperation of the machine manufacturer.

MJC CARTRIGE VERSION

MJ mechanism in a cartridge to be inserted partially or completely in the machine pallet by the machine manufacturer in a specially designed pallet. Possibility to adapt the cartridge to the needs of the machine manufacturer.

S

STAND ALONE

■ Ø300/390 - Ø520/750

Application/customer benefits

- Equipment of machining centers to manually operate a power chuck
- Ideal for 5 axis tuning-milling machines without air/oil feed
- Ideal for palletized machines due to mechanical irreversible constant gripping force
- Better alternative to a manual chuck thanks to the use of power chucks
- To operate any type of power chuck: 2/3/4 jaws, 2+2, 6 jaws, 2+2+2 etc.
- Best with sealed power chucks of the SMW-Autoblok Proofline series
- The large variety of SMW-Autoblok power chucks allow the customer to clamp the workpiece with the best chuck alternatives
- No need of air/oil feeds making it a perfect solution for pallet changing systems
- Easily interchangeable among several machines
- Easily adaptable to the machine table/pallet with different centering and mounting threads patterns
- To operate chucks in both external and internal clamping

Technical features

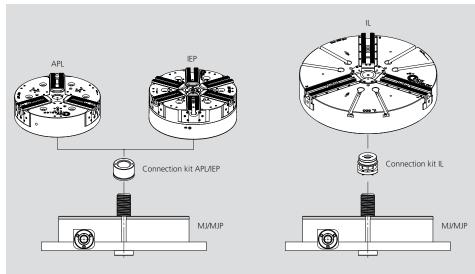

- Irreversible mechanism based on an operating screw driven by a worm gear
- With spring energy storage for safe clamping
- Sealed mechanism and constantly lubricated
- Very low profile and possibility to integrate it in the machine pallet
- Low operating torque to reach the desired pull force (depending on the chuck)

Standard equipment

Manual jack, depending on the application with customized centering and base flange

Order Example

Manual Jack MJ 380/480 part nr. 97003802

MJ KIT
